25 Years of Excellence

Albert International is a modern, high-tech company with an exceptional reputation for quality, product innovation and technical competence. We produce a wide variety of soft Poly Vinyl Chloride (PVC) products for both the medical and industrial world markets through the use of computer-controlled rotational molding machines and PVC dispensing systems. Our customers, over the decades, have come to value the flexibility and high quality standards of Albert International and the Albert Group with production plants worldwide.

Quality is our passion: 25 years of excellence

We strive to create an open and respectful workplace that encourages people to work together and share a common ambition to succeed by delivering outstanding quality in what we do. Due to the dedication and endurance of all our employees for the past 25 years we are now one of the world leading companies in our field.

Therefore I want to personally thank all our employees, partners and people who have accompanied us over the years. Without your continuous support we would not be able to celebrate this anniversary. Thank you!
